ADDITIONAL CONDITIONS

Scope of work: - The Scope of work will consist of Construction of Rain Water Harvesting system in NIEPMD Campus as per following details:

1. Rain Water harvesting system as per the Locations and Details of proposed recharge wells (RCWs)

Rooftop Harvesting

a. The Programming and Service block is the biggest in this campus. Rainwater falling on this block is brought down by several rooftop pipes located all around the building. The pipes located on the eastern side, discharges water onto unpaved native sandy soil, which will percolate efficiently into the soil to recharge the aquifer. Whereas the pipes located on the other three sides discharge water onto the lawn and asphalted roads, which may not percolate as efficiently. Four pipes on each side will have to be interconnected at the lintel level and taken to a 1.5M dia and 4.5M deep RCW. In all, 6 numbers RCWs will have to be dug (2 on the northern side, 2 on the southern side and 2 on the western side) for this block alone.

Northern side

North Western side

Southern side

b. In the Special Education Programme block there are once again several rooftop pipes located on all sides to bring down the rooftop rainwater.

Of these, the ones on the eastern side discharge the water onto unpaved areas, which are very sandy. This can be taken as harvesting. Whereas the pipes located on the western side discharge rooftop water onto lawns, which overflows onto asphalted roads, runs off and gets scattered. This should be harvested by interconnecting the pipes and taken to a 1.5M dia and 4.5M deep RCW located nearby.

- c. In the Existing Service building which is the only building with a sloping roof, the rooftop water has been channelized and brought down by two pipes. These pipes can be discharged into two 1.5M dia and 4.5M deep RCWs (one for each pipe) located nearby.

TECHNICAL SPECIFICATIONS & SPECIAL CONDITIONS:

1. Concrete grade to be used in RCC work will be M-20 with nominal grade mix as 1:1 ½:3 and reinf. Will bet MT bars.
2. Mixing of concrete will be in Diesel Operated Mixer. Hand mixing of concrete will not be allowed.
3. Compaction of concrete will be done by Nozzle Vibrator.
4. Cover blocks will be of concrete. Stone pieces will not be allowed to be used as cover block
5. Cement to be used for RCC work will be OPC 43 grade.
6. Sample of finishing materials will be first got approved by contractor before procuring in bulk.
7. Contractor will use only ISI marked materials (wherever applicable) and will use only those makes of materials in his work which have been mentioned in the list of 'Approved makes of materials' given below. Wherever NIEPMD so directs the Contractor, he will get the material tested at a suitable laboratory and submit test results to NIEPMD, at his own cost.
8. Detailed specification of various BOQ items will be as per relevant IS Codes & CPWD Specifications
9. Cost of concrete work (both PCC & RCC) quoted by the contractor will include mixing of concrete in Diesel operated mixer, transportation of concrete, compaction (with Nozzle vibrator), curing and finishing smooth.
10. Cost of brickwork and plastering will include curing for adequate number of days as per specifications.
11. Contractor will use only steel shuttering and scaffolding for casting concrete in RCC work
12. Since the excavation is up to 6 -7 mtrs from ground level, therefore, proper precaution to be taken care during execution of job till it's completion towards safety of man and material.
13. Proper slope to be made from excavated earth keeping in view the safety of man and material. It should comply with the latest CPWD safety norms and guide lines.
14. Before quoting rates, contractor is requested to see the site as the surrounding earth consists of soil, soft & hard rocks. Proper Machines are to be used for excavation of the area. Bidder must take care of all expenditure into account towards man, material and equipment while quoting rates.
15. Working area should be well protected from residents/children as work to be done in playground of NIEPMD Campus. The construction site area shall be cordoned off by providing GI Sheets around work site during execution. As per latest guide lines, contractor should ensure by proper covering so that dust does not fly around from excavation site. The cost for the above should be included in the item rates quoted. No extra payment will be made for the same.

/CONTRACTOR/

**The Director, NIEPMD
Muttukadu, Chennai-112**
